

# Buy-Side Execution Trader

## Buy-Side Execution Trader

Responsible for efficiently transacting trades on behalf of Portfolio Managers and ensuring objectives are met. Adds value by determining most favorable and efficient trade execution strategy in prevailing market conditions. Applies firm's best execution policy and maintains relationship with trading counterparties. Acts as the eyes and ears on market, may generate ideas, and develop execution algos, trading systems and workflow processes.

### Who I Work With

#### Portfolio Manager

Manages fund and makes investment decisions based on mandates, expected returns and risk tolerances

#### Buy-Side Research Analyst

Specialist who produces research, analyzes markets and generates investment recommendations for PMs

#### Sell-Side Sales Trader

Generates trading revenue by pitching ideas to clients, providing market access and some sometimes committing liquidity

#### Sell-Side Trader

A market maker who provides liquidity by participating in market at all times, buying securities from sellers and selling to buyers. Manages risk out of their own trading book.

#### Compliance

Responsible for ensuring firm adheres to regulatory requirements across trade and reporting lifecycle

#### Back Office

Oversees activities such as distribution, reconciliation and matching, and trade settlement.
